STRATEGIC HIGHWAY RESEARCH PROGRAM

Accelerating solutions for highway safety, renewal, reliability, and capacity

Regional Operations Forum
How to Organize for Operations

TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES

"Organization"

What are we talking about?

- Organize *Internally* for effective conduct of TSMO mission
  - *On the Org Chart*
    - ✓ Functions, roles and reporting
  - *Not on the Org chart*
    - ✓ responsibilities, authority and accountability
    - ✓ dotted line relationships

- *External* relationships formalized for effective collaboration

TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES

"Organization"

What are we talking about?

- Organize *Internally* for effective conduct of TSMO mission
  - ✓ Functions, roles and reporting
  - ✓ responsibilities, authority and accountability
  - ✓ "dotted line" relationships

- *External* relationships formalized for effective collaboration

What Needs to be "Organized?"

Vertical :

- Span of control = align responsibility with authority
- Hierarchy – manager in position to make trade-offs regarding performance
  - Too low = no control of technical functions
  - Too high = no knowledge of technical functions
- Decentralization: HQ vs. districts roles -- need for "matrix reporting"
- Is TSMO truly a "program": how high up in agency hierarchy is top level staff person with **full time** TSMO responsibility (compared to other agency programs)

TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES

# What Needs to be "Organized?"

- <u>Span of control</u> - align responsibility with authority
- <u>Span of influence</u> - Relationship/leverage over support functions
- <u>Hierarchy</u> – manager in position to make trade-offs regarding performance
- Ways to <u>coordinate key business process functions</u>
  - Real-time procedures and protocols
- <u>Decentralization - HQ vs. districts roles</u> -- need for "matrix reporting"
- Is TSMO truly a "program"? How to tell?
  - Discussion item

SHRP2
STRATEGIC HIGHWAY RESEARCH PROGRAM

TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES

What Needs to be "Organized?"

Horizontal:

- Relating engineering to field operations
- Relationship/leverage over support functions (planning, maintenance)
- Ways to coordinate key business process functions
- Real-time procedures and protocols
- Authority for external coordination

TSMO Organization must respond to both "office" and "real-time" functions

Conventional Agency Processes Taking Place In Administrative Time →					
Scoping & Business Processes	Accommodate Program in Portfolio	Interagency Coordination			
		Plan and program	Systems Engineering		
Technology and Systems Deployment			Infrastructure for Situational Awareness	Infrastructure for Control	
Maintenance				Asset Management	

Operations Actions Taking Place In Real Time →		
Systems Operations & Performance Monitoring	Real-Time Mobilization of Equipment/ Personnel	Interagency Coordinated Execution of Event Response Activities
	Situation Status Communications and Reporting (Internal and External)	
	Performance Monitoring	

The challenge—working within legacy context

| Feature	Legacy organization	TSMO
Mission alignment	*Conventional CE culture/missions*	*New, competes with legacy*
Performance Accountably	*On time, budget, standards*	*System performance in customer terms*
Focus	*Project schedule in months*	*Real-time response (24 X7)*
Core competencies	*Defined via tradition, training,*	*Not well- defined, limited schooling*
Unit Organization	*By stages in project*	*By requirements of ConOps*
Responsibility/ authority	*Clear*	*Often forced into legacy - silo champion -dependent*
Partnerships	*Contracted -- based on State standards*	*Collaboration among independent entities*

Organization as integral to all agency key capabilities

CAPABILITY LEVELS FOR IMPROVING TSMO EFFECTIVENESS				
DIMENSIONS	**Level 1 Performed**	**Level 2 Managed**	**Level 3 Integrated**	**Level 4 Optimizing**
Business Processes				
Systems & Technology				
Performance				
Culture				
Organization/Workforce				
Collaboration

TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES

Two extremely different org charts (first)

SHRP2
STRATEGIC HIGHWAY RESEARCH PROGRAM

TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES

Two extremely different org charts (second)
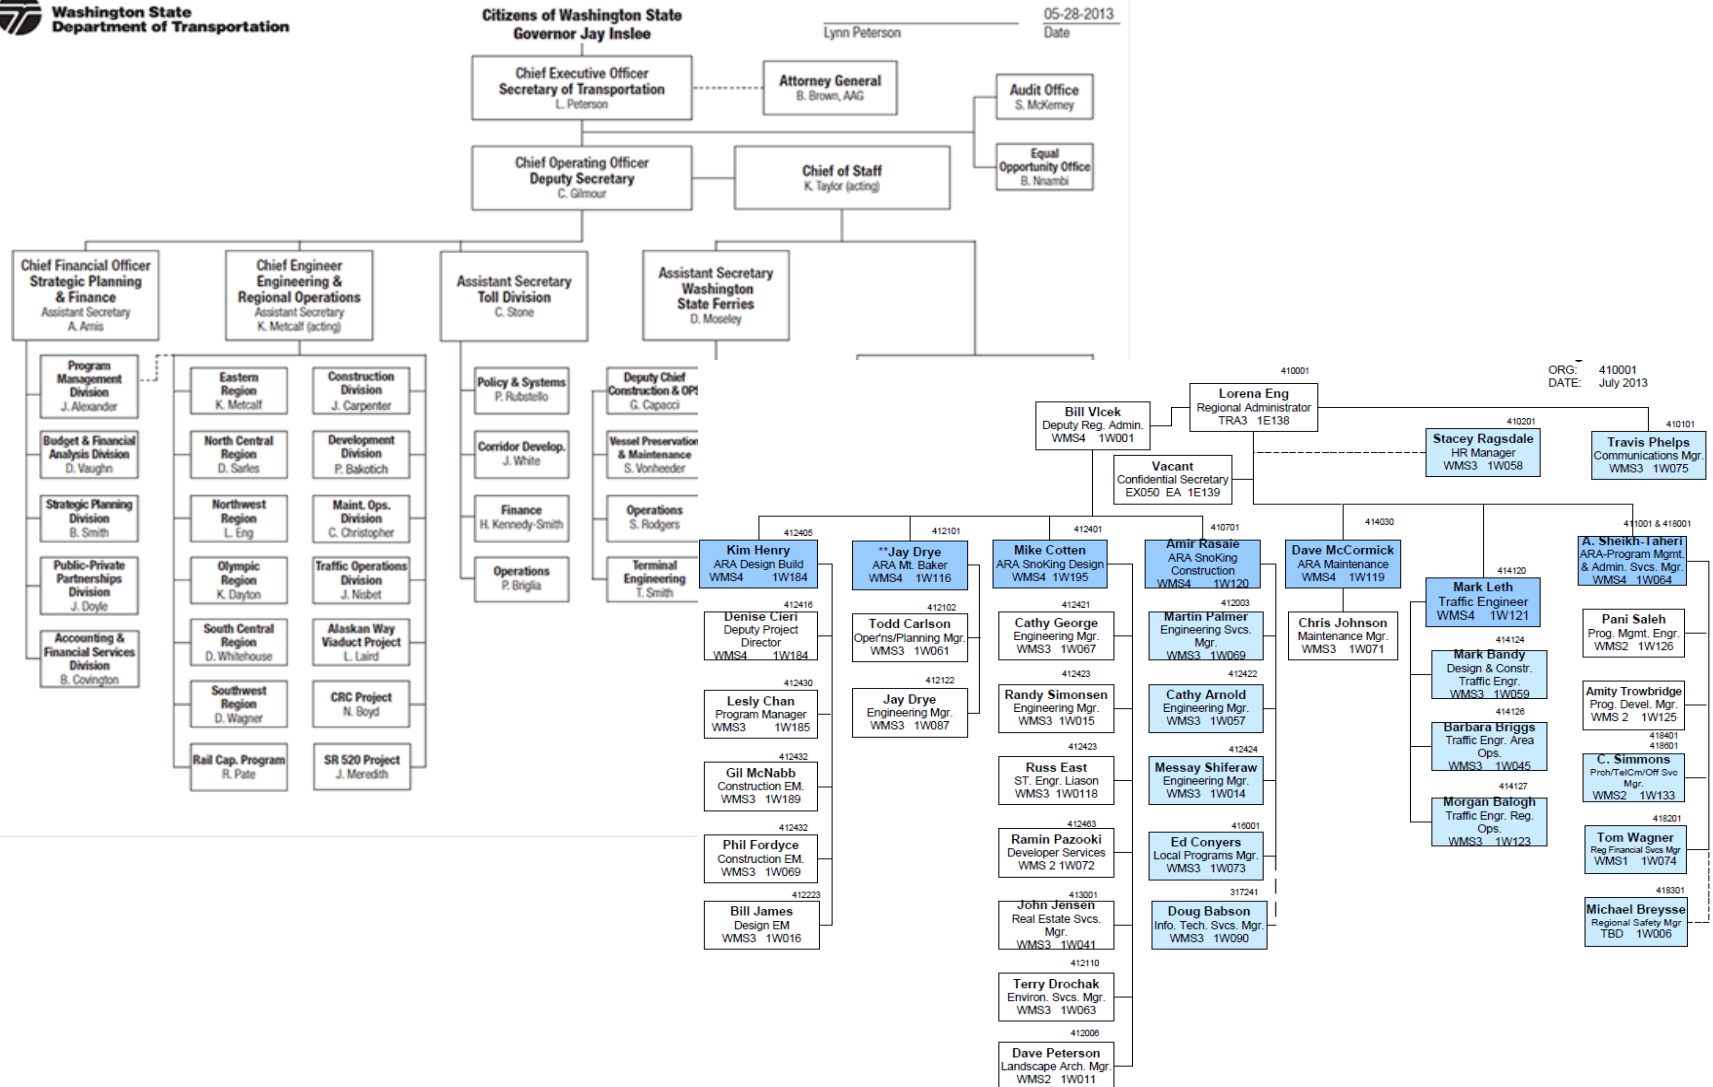

Question: how do the other five dimensions affect (or are affected by) organization?

- Business Processes
- Systems & Technology
- Performance
- Culture
- Collaboration

Getting to the Next Level

Level of capability criteria for organization and staffing			
Level 1 Performed	**Level 2 Managed**	**Level 3 Integrated**	**Level 4 Optimizing**
TSMO added on to units within existing structure and staffing, dependent on technical champions	TSMO-specific organizational concept developed within/among units -- with core capacity needs identified; collaboration takes place	TSMO managers have clear responsibility/accountability; job specs, certification and training for core positions	TSMO org at equivalent level with other agency services and staff professionalized
Number of ROF agencies	xxxxx	xxxxx	xxxxx

OF THE NATIONAL ACADEMIES

Staffing Issues

- Does TSMO have unique staffing requirements -- professional/non-professional/field

- What are the needed core capabilities, i.e., the KSAs – management and technical?

- How can they be acquired?

SHRP2
STRATEGIC HIGHWAY RESEARCH PROGRAM

TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES

Staffing Considerations

- Position specifications (KSAs) and grade levels for key technical capabilities

- Acquiring the needed capabilities (engineering vs. operations:
  - On the job training (who does it?)
  - Outsourcing (if staff slots limited)
  - Stealing (from other DOTs, consultants?)

- Recruitment and Retention (external competition)
  - Grade Levels – are they attractive?
  - Conditions of employment? ($$ & career opportunities)
  - Training and co-training provided by ………………?

Career Development

Table 3. Human resources: generic activity group I.

Monitors, classifies, assesses, and archives data and other inputs regarding traffic accidents, road surfaces, traffic density, weather, traffic signal operation/malfunctions, construction projects, major disasters, and special events to maintain constant awareness of traffic system operation.

	Entry Level	Full Performance	Advanced
Knowledge	• TMC metro area road system. • Use of common language/terms used to describe traffic conditions.	• Road locations that are critical to traffic safety and/or traffic flow. (C; D) • TMOT's manual, including policies and procedures. (D) • Traffic system terminology. (B; D) • Principles of technical traffic engineering (e.g. queuing, capacity). (D; G)	• Traffic signal timing selection plans. (D; F2; H3) • HAZMAT policies, procedures and codes. (H2) • Overheight vehicle control regulations and response plans. (D; H7) • Rail crossing traffic signal controls and response plans. (D; F2; H3)
Skills/Abilities	• Skill in visualizing map locations (i.e., map reading skill). • Skill in reading and listening to detailed or technical information. • Ability to communicate orally and in writing to provide information clearly and succinctly. • Ability to learn a body of material consisting of regulations, and/or procedures. • Demonstrated success in dealing with pressure situations.	• Ability to analyze multiple source data from equipment and people under time pressure. (D; G) • Ability to communicate effectively with transportation system audiences (e.g., police, highway helpers, public). (C, D)	• Ability to interpret conflicting or ambiguous traffic incident/congestion information. (C; G; H4) • Ability to make a disciplined and timely assessment of information on potential for major disasters and emergencies. (C; G; H4)

Outsourcing: Threat or Opportunity?

What functions could be outsourced?

- Engineering & planning (ConOps, architecture, ITS systems design)
- TMC staffing
- Traffic data and analysis/modeling
- ITS device/communications/systems maintenance
- Safety Service Patrol
- Construction inspection

- How can you best manage performance?

- What core capacities *must* be in-house?

- What are you doing and why?

Main points – Take Away

TSMO has unique organizational requirements (vs. legacy)

- Includes functions not easily accommodated in <u>legacy organizations</u>.

- <u>No one "best" organization</u> given differences in size/number of regions in state; scale of program

- <u>Commitment to real time customer service</u> from leadership and other units

- Management <u>recognition of special staffing needs</u> – technical, managerial and collaborative

Criteria for effective organizations

- ➢ Link between responsibility and authority for key functions
- ➢ All units in agency need to understand/support real time functions
- ➢ Reporting with accountability to monitor effectiveness
